ABOUT ME

I'm Mahmod, 25, and a Vue/React/Node/Typescript Fullstack developer. with 3 years of experience, I specialize in developing high-quality, scalable, and efficient web applications that meet business requirements. I have a strong proficiency in web development technologies, such as HTML, CSS, and JavaScript, as well as experience working with popular web development frameworks like React, Next, Vue, Nest. My experience also includes collaborating with cross-functional teams to develop new features, improve existing functionality, and troubleshoot issues. With a focus on continuous learning and professional development. I am proficient in cutting-edge technologies and also understand the fundamental principles of earlier days. In-depth knowledge, not just tutorials. I stay up-to-date with the latest web development trends and techniques to ensure that the applications I develop are optimized for performance, accessibility, and security. I am dedicated to delivering top-quality results and providing a positive.

WORK EXPERIENCE

Frontend Engineer

Unifi Solutions [14/04/2021 – Current]

Development of an e-commerce platform

See more tech project

Disrupt-x <https://disrupt-x.io/> - <https://cloud.disrupt-x.io/>

United Arab Emirates - Dubai

Disrupt-x : Global IOT Solutions Platform is a UAE-based platform provider that is committed to leveraging the growth of technology and digitalization through the development of smart AI-based solutions that deliver innovative IoT products . during my time at Disrupt-X i did:

Developed Reusable Components around the System

Worked on Real Time Ticketing system for customer support

Developed and implemented architectures for web applications

worked on wrapper Vue js libraries for google map and zingchart

some of the new solutions a worked on:

Metro Locks :

IoT Solution For Securing Your Assets Efficiently. Metro Watch Solution Offers Smart Padlocks, Smart Parking And Tracking Solutions To Secure And Manage Your Assets Using An IoT Cloud Platform And Mobile App.

Fleet Management :

End To End Solution For Managing Your Fleet Through Real-Time Tracking, Route Optimization, Vehicle, And Driver Management, And Continuous Vehicle Health Monitoring.

Smart Parking :

IoT solutions for efficiently managing parking spaces, tracking parking space utilizations and to prevent unauthorized accesses and overstay through optimized sensors and IoT platform .

Facility Booking :

IOT solution for efficiently managing building spaces, track spaces workload and unauthorized booking through optimized sensors and IoT platform

Cloud Orbit :

Believes In A Greener And Cleaner Environment. To Contribute To This, We Have Developed An End IoT Solution For Community Managers And Municipalities That Will Allow Them To Monitor Waste Fill Levels And Rodent Infestations.

Full-stack Developer

Freelance [01/01/2020 – 31/12/2021]

Understanding the client's requirements and developing a project plan accordingly.

Designing and developing user-friendly and responsive websites or web applications.

Developing both the front-end and back-end of the website or application.

Testing and debugging the website or application to ensure that it meets the client's requirements and is free from errors.

Deploying the website or application on the server and ensuring that it is running smoothly.

Providing maintenance and support services to the client after the website or application has been delivered.

PROJECTS

ChatXo

<https://chat-xo.vercel.app/>

Developed a real-time chat application using Next.js 13 and Nest.js, leveraging the latest features and best practices for efficient and scalable web applications. The application allows users to interact with their friends through a user-friendly interface while ensuring high performance and security.

Key Features:

- Built using Next.js 13 and Nest.js for an optimized and modular architecture.
- Implemented server-side rendering (SSR) for improved SEO and faster initial load times.
- Enabled real-time messaging using WebSockets for instant communication between users.
- Designed and developed an intuitive UI for friend mapping, including adding, deleting, and searching friends.
- Integrated social media login and registration for seamless user onboarding and authentication.
- Added middleware in Next.js 13 for user authentication and secure access to protected routes.
- Utilized server-side logic in Next.js 13 for efficient data fetching and management.
- Ensured code quality and maintainability through consistent use of design patterns and best practices.

EDUCATION AND TRAINING

Information Technology

Al-Baath University [08/02/2016 – 21/09/2020]

Thesis: A safe system for electronic voting

Tech: blockchain , Ethereum , Smart contract ,Solidity ,Truffle ,Ganache ,Javascript ,Web3.js

DIGITAL SKILLS

TypeScript / React (JS) / Next JS / Vue JS / Node JS / NestJS / NoSQL | MongoDB / Git (Basic Knowledge) / Tailwind CSS / Blockchain
