ABOUT ME

I am Mahmod, a passionate Full Stack Software Engineer with over four years of experience, specializing in front-end development. My career has been marked by my work on cutting-edge platforms, particularly in the realms of IoT, AI, and data analysis. These high-impact projects, often involving large-scale data, have honed my skills and provided me with deep technical expertise. I excel in dynamic team environments, bringing innovative solutions and a collaborative spirit to every project. My ability to manage complex tasks and drive projects to successful completion has been a key factor in my contributions to various high-profile platforms. I am committed to continuous learning and professional growth, constantly seeking out new challenges and opportunities to leverage my skills to deliver exceptional results.

WORK EXPERIENCE

06/04/2023 – CURRENT

Frontend Engineer Unifi Solutions

- Managed and led a team of four frontend developers and two designers, successfully integrating all aspects of the application development process, including planning, requirements analysis, design (APIs design, UI/UX design), development, testing, and continuing support.
- Optimized team performance by studying the personalities of team members and assigning tasks that matched their strengths, ensuring the best use of resources and achieving project objectives.
- Developed reusable frontend components, created user experience graphics, and organized development resources for a modular approach to the project.
- Enhanced page performance by 95% for data-intensive applications, including tracking systems and map-based solutions, optimizing load times and ensuring a smoother user experience.
- Designed and implemented advanced analysis pages utilizing D3.js and Highcharts for data visualization, providing users with deep insights and interactive graphical representations of complex datasets.
- Developed a high-performance tracking system managing over 5,000 vehicles with real-time monitoring Integrated playback functionality, enabling users to review vehicle activity for specific dates, while ensuring optimal system performance.

10/05/2021 – 29/04/2023 Dubai, United Arab Emirates

Frontend Engineer Disrupt-X

- Contributed to the development of a large-scale IoT project, collaborating with various IoT solutions and assisting in selecting the appropriate architecture for system orientation
- Handled Google Maps integration and implemented all map-related functionalities, including tracking systems, geofencing, pullbacks, clustering, and performance optimization to efficiently manage large-scale map data.
- Developed reusable frontend components, created user experience graphics, and supported the organization of development resources for a modular approach to the project.
- Worked alongside a team of six frontend developers and two designers, participating in all aspects of the application development process, including planning, requirements analysis, API design, UI/UX design, development, testing, and ongoing support.
- Designed and implemented a dynamic reporting system using Vue.js that allowed users to create and schedule PDF reports. The reports were customizable and included various visualization tools such as charts and graphs to help users gain valuable insights.
- Developed powerful analysis pages featuring D3.js visualization tools, delivering critical insights to end-users.

17/01/2020 – 11/05/2021 Dubai, United Arab Emirates

FullStack Freelance

- Architected, designed, and led the development of two platforms for a car dealership and real estate management system. These projects involved dynamic property and vehicle listings with advanced features for admins and end-users.
- Developed web applications using Laravel, Nuxt.js, and MySQL to streamline processes, enabling custom fields, data validation, and advanced filtering.
- Implemented server-side rendering (SSR) with Nuxt.js to enhance SEO, improving the visibility of both platforms.
- Integrated OAuth authentication (Facebook, Google, Apple), ensuring secure and seamless sign-in for users.
- Optimized performance and scalability, ensuring efficient data handling and the capacity to manage high volumes of listings across both platforms.

● EDUCATION AND TRAINING

08/02/2016 – 21/09/2020

COMPUTER SCIENCE Al-Baath University

Thesis Developing a secure electronic voting system using blockchain technology, Ethereum, smart contracts (Solidity), Truffle, Ganache, and implementing with Javascript and Web3.js.

● DIGITAL SKILLS

React (JS) | Next JS | Vue JS | tailwind css | MobX,Zustand | Vite | TypeScript | Node JS | NestJS | NoSQL | MongoDB | RESTful APIs | Blockchain | CI&CD | Git, Bitbucket, Gradle, CI, Jenkins, JIRA, Docker

● PROJECTS

Disrupt-x

Disrupt-X is a global IoT solutions platform headquartered in Dubai and Malaysia. The company is a leading provider of smart, AI-based technology solutions and digitalization. It serves over 25,000 customers. Some of the new IoT solutions I contributed to include:

Fleet Management - Metro Locks - Smart Parking - Facility Booking - Cloud Orbit - Cognitive Neurons

link: <https://disrupt-x.io/> - <https://cloud.disrupt-x.io/>

Facilitrol-X

Facilitrol-X :Facilitrol-X is an all-in-one CMMS and CAFM solution designed to streamline your facility management by integrating with IoT data, BMS, and existing systems. Gain complete visibility of your assets, equipment, and maintenance operations, along with real-time IoT insights, all on a single cloud-based platform. Facilitrol-X simplifies the complex, making facility management more efficient, proactive, and data-driven.

ABIOT

ABIOT:ABIOT is the Leading Saudi IoT Solutions Platform with a drive to constantly develop innovative and effective IoT solutions for multiple use cases and wide range of customer verticals. Our solutions offer scalability and efficiency, revolutionizing connectivity from a single asset level to a city level some of the new IoT solutions I contributed to include:

Smart Next - Asset Watch - Facility Booking

link:<https://abiot.io/>

Aligner-KDS

Aligner-KDS :Aligner-KDS is an advanced kitchen display system designed to optimize restaurant operations. This state-of-the-art solution features an intuitive interface, real-time order management, and enhanced communication between kitchen and front-of-house staff. It includes an admin dashboard, a super admin dashboard, a kitchen screen for real-time order display,an order screen, and a customer display screen showing the current order number. The system also offers real-time inventory management, detailed order analytics.

Cracking IoT Conference

The Cracking IoT Conference, touted as the largest event of its kind in the Middle East and North Africa, took place in the UAE in collaboration with Intel Corporation. This prestigious gathering convened 300 C-Suite executives from various industries. Participants had the opportunity to glean insights from more than 40 global leaders in the IoT sphere through keynote addresses, panel discussions, and interactive workshops. The discussions encompassed a wide range of topics, including innovative IoT applications and security challenges.
