Professional Summary

Software Engineer with 5+ years of experience in developing high-performance, scalable applications, specializing in front-end development for AI and IoT projects. Proven expertise in real-time data processing, UI/UX optimization, and system architecture. Passionate about building intuitive and efficient user experiences while enhancing application performance and maintainability

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | Ntira AI Applications and Services Oct 2024 – Present

- Developed and optimized 3+ AI-powered Chrome extensions, enhancing performance and UX.
- Architected a modular structure for Chrome extensions using React, Tailwind CSS, and TypeScript.
- Addressed large-scale data challenges in AI-driven applications, improving real-time processing.
- Improved UI/UX design, ensuring intuitive and high-performance front-end solutions.
- Applied Domain-Driven Design (DDD) and Design Factory patterns for scalable architectures.

Frontend Lead | Unifi Solutions Jul 2024 – Feb 2025

- Managed and led a team of 4 frontend developers, overseeing the full development lifecycle.
- Increased team efficiency by 20% through effective task delegation.
- Optimized performance, reducing load times from 8s to <1s, boosting user retention by 30%.
- Developed a reusable frontend component library, cutting development time by 40%.
- Built real-time data visualization tools using D3.js and Highcharts, improving decision-making.
- Designed a high-performance tracking system monitoring 5,000+ vehicles, reducing operational costs by 15%.
- Led platform localization efforts, ensuring seamless multilingual support.

Senior Frontend Developer | Unifi Solutions Apr 2023 – Jun 2024

- Built a scalable component library, ensuring consistent UI across multiple projects.
- Optimized performance, reducing page load times and improving responsiveness.
- Developed dynamic form builders and configurable UI components, enhancing adaptability.
- Integrated real-time data streaming using WebSockets & GraphQL, enabling live dashboards.
- Designed interactive dashboards with D3.js, Recharts, and Chart.js.
- Refactored legacy codebases, implementing modern best practices.
- Implemented state management solutions with Zustand & Redux for scalability.

Frontend Engineer | Disrupt-X May 2021 – Jun 2023

- Developed a large-scale IoT platform, integrating advanced tracking and monitoring solutions.
- Optimized a real-time vehicle tracking system for 5,000+ assets, reducing costs by 15%.
- Designed a dynamic reporting system using Vue.js, enabling customized analytics dashboards.
- Led Google Maps integration, implementing features like tracking, geofencing, and clustering.
- Developed multilingual platforms, enhancing global accessibility.
- Built reusable UI components to improve modularity and scalability.

Full-Stack Developer | Freelance Jan 2020 – May 2021

- Developed and maintained platforms for car dealership & real estate management.
- Built web applications using Laravel, Nuxt.js, and MySQL.

- Improved SEO & performance using SSR with Nuxt.js.
- Integrated OAuth authentication (Google, Facebook, Apple) for secure user access.
- Optimized systems to handle high data volumes smoothly.

Technical Skills

- **Frontend:** Next.js, React.js, TypeScript, JavaScript, Zustand, Redux, Context API, Tailwind CSS, styled-components, Material UI, Bootstrap, CSS3, HTML5, Web3
- **Backend:** Node.js, NestJS, REST APIs
- **Data & Performance:** WebSockets, GraphQL, MongoDB, MySQL, D3.js, Highcharts, Chart.js
- **Cloud & DevOps:** Docker, CI/CD (GitHub Actions, Jenkins, Bitbucket), AWS, Firebase
- **Others:** Blockchain (Ethereum, Solidity, Web3.js), OAuth, Localization, PWA

Education

B.Sc. in Computer Science | Al-Baath University

2016 – 2020

Thesis: Developed a secure electronic voting system using Ethereum, Solidity, Truffle, and Web3.js.

Key Projects

- **Disrupt-X | IoT & AI Platform** – Built scalable IoT solutions, integrating real-time data analytics, AI insights, and sensor connectivity across multiple industries.
- **ABIOT | IoT Marketplace** – Developed an IoT solutions marketplace for smart cities, healthcare, and industrial automation with seamless integration capabilities.
- **Facilitrol-X | Smart Facility Management** – Engineered an IoT-powered building automation system for energy, security, and HVAC optimization.
- **Medxsol | Healthcare Solutions** – Created a medication management system with blister pack automation, real-time eMAR tracking, and clinical workflow optimization.
- **ALEF IoT Platform** offers a complete solution for managing IoT devices, supporting multiple protocols, and providing flexible cloud or on-premises deployment.
- **Cracking IoT Conference** The largest IoT event in MENA, held in the UAE in collaboration with Intel, bringing together 300 C-suite executives and 40 global IoT leaders for discussions and workshops.
- **TechNex | Fleet Management** – Developed a real-time vehicle tracking system with GPS, driver behavior monitoring, and task automation for enhanced fleet efficiency.
- **Asset Watch | IoT Asset Tracking** – Designed an IoT-based indoor/outdoor asset tracking solution with geofencing, real-time alerts, and custom reporting.
- **Ignite Shield | Facility Monitoring** – Engineered an IoT-driven asset monitoring system with predictive maintenance, 24/7 remote management, and AI-powered analytics.
- **Cognitive Neurons | ANPR System** – Built an Automatic Number Plate Recognition (ANPR) system for automated vehicle access control and paid parking management.
- **Defcon Patrols | IoT Security** – Developed a centralized security platform with intrusion detection, real-time alerts, and AI-enhanced video analytics.
- **Ignite Meter | Smart Utilities** – Designed a real-time energy monitoring platform for water, gas, and electricity consumption, enabling cost reduction and efficiency.
- **Aligner-KDS | Restaurant Order System** – Built an interactive kitchen display system with real-time order tracking, inventory management, and multi-screen interfaces.
- **Metro Locks | Smart Access Control** – Developed intelligent locks and parking access systems with real-time monitoring and remote control.
- **Urban AI | Video Analytics** – Created an AI-driven video analytics platform for optimizing traffic, space utilization, and security monitoring
