ABOUT ME

I'm Mahmud, a 26-year-old Fullstack developer with 4 years of expertise, specializing in Vue, React, Node, and TypeScript. I excel in crafting high-quality, scalable web applications that precisely meet business requirements. Proficient in HTML, CSS, and JavaScript, I've honed my skills with frameworks such as React, Next, Vue, and Nest. I seamlessly collaborate with cross-functional teams, contributing to feature development, enhancing existing functionality, and troubleshooting issues. Committed to continuous learning, I stay abreast of both cutting-edge technologies and foundational principles, ensuring a robust skill set. My dedication to staying informed on the latest web development trends ensures optimal application optimization.

WORK EXPERIENCE

14/01/2021 – CURRENT

Front-End Engineer Unifi Solutions

In my role at Unifi Solutions, I played a key role in major IoT and e-commerce projects:

1. Project Development:

- Led the development of critical IoT and e-commerce projects, enhancing overall application functionality.

2. Third-Party Tools Utilization:

- Implemented features using tools like Google Maps, ZingChart, and i18n, elevating application capabilities.

3. User Access Management:

- Designed and implemented a robust user access system with distinct roles, ensuring a secure environment.

4. Innovative Time-Based Access:

- Developed a sophisticated time-based access system, significantly improving user control and security.

5. Time Zone Coordination:

- Addressed challenges of different time zones, implementing a clean solution for team coordination.

6. Reporting System:

- Contributed to a robust reporting system, generating detailed reports with flexibility for customization.

7. Mapping and Data Processing:

- Integrated tracking devices on maps, facilitating real-time monitoring and extracting insights from big data logs.

8. Data Form Handling:

- Managed intricate data forms, ensuring effective processing of extensive data logs.

01/01/2020 – 31/12/2021

Full Stack Developer Freelance

1. Analyzing client requirements and creating project plans.

2. Designing responsive and user-friendly websites/applications.

3. Developing both front-end and back-end functionalities.

4. Conducting thorough testing and debugging to ensure error-free delivery.

5. Deploying and maintaining smooth website/application operation on servers.

6. Offering ongoing maintenance and support post-delivery.

EDUCATION AND TRAINING

08/02/2016 – 21/09/2020

Computer Software Engineer Al-Baath University

Thesis Developing a secure electronic voting system using blockchain technology, Ethereum, smart contracts (Solidity), Truffle, Ganache, and implementing with Javascript and Web3.js.

DIGITAL SKILLS

TypeScript | React (JS) | Next JS | Vue JS | Node JS | NestJS | NoSQL | MongoDB | tailwind css |
Blockchain | Socket e Websocket | MobX,Zustand | React Hooks, React Redux | Material UI | Quasar
framework | RESTful APIS | Vite | Node Js (JavaScript) | Docker

PROJECTS

DisruptX

Disrupt-X : Global IoT Solutions Platform is a UAE-based platform provider that is committed to leveraging the growth of technology and digitalization through the development of smart AI-based solutions that deliver innovative IoT products

link: <https://disrupt-x.io/> - <https://cloud.disrupt-x.io/>

Facilitrol-X

Facilitrol-X is an all-in-one CMMS and CAFM solution designed to streamline your facility management by integrating with IoT data, BMS, and existing systems. Gain complete visibility of your assets, equipment, and maintenance operations, along with real-time IoT insights, all on a single cloud-based platform. Facilitrol-X simplifies the complex, making facility management more efficient, proactive, and data-driven.
